

Modbus Project for Vivarox EMS

Modbus Project for Vivarox EMS This is a specification and estimation of the required hardware and costs. More detail will be added and real time testing is required.

Arduino Option:

To connect to Modbus and read information onto an SD card using an Arduino.

PM8000 Meter (SD Card)

See the information on the Schneider PowerLogic PM8000 [Source Code](#).

VSD Generic (SD Card)

See the information on the VSD Generic [Source Code](#).

Raspberry Pi Option:

[Check this page for the Raspberry PI option](#)
